Wind & Usage Disclaimer

This schedule and guidance assume installation on a flat, stable surface and proper assembly in accordance with instructions. Conditions such as uneven flooring or incorrect setup may affect performance and safety. Parasols are not permanent or fixed structures and must be used with care. Environmental factors – particularly wind and sudden weather changes – can significantly impact stability. Parasols should only be opened when supervised and in suitable weather conditions. In the presence of strong winds, gusts, or adverse weather, the parasol must be closed immediately. Failure to do so may result in damage to the product or injury. Customers and staff are responsible for ensuring the parasol is used appropriately and safely at all times.
