ShadeArt Storm S - 5.0 metre Octagonal cluster with Anthracite Masts

ShadeArt Storm S - 4.0x4.0 metre Square Anthracite Mast & Boulder PVC Canopy

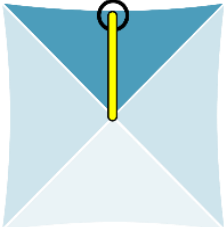

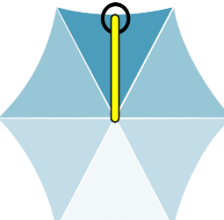

## Storm S - wind engineered Side Post Parasols Ex-Factory UK - Trade Prices V1 2026

Introducing the Storm S—the unrivalled leader in wind-resistant Sidepost and Cantilever parasols. The mast and booms use high-strength steels, treated with zinc or hot-dip galvanised, then painted. The central hub consists of high-strength solid cast alloy or steel. The spokes use Marine anodised T6 aluminium or engineered steels. The winder is easy to open and made from sleek, low-maintenance stainless steel. The tension canopies, fashioned from top-tier PVC by Ferrari, Mehler, Sauleda, or other renowned brands, each include a resilient stainless catenary cable. **Proudly made in the United Kingdom**

**Fixed mast** means the canopy is in a static position open or closed

**Rotating mast** allows you to position the canopy for optimal shade as the sun moves. When not in use, the mast lets you neatly rotate the canopy to the side or rear, keeping it out of the way.

SHADEmakers offer a comprehensive range of parasol base systems engineered to meet diverse installation requirements. Solutions include ground anchors for permanent fixing, integrated planter and seating box bases for dual-purpose applications, mobile units with lockable castors for flexibility, and fixed bases equipped with adjustable levelling feet for precise positioning on uneven surfaces.

Storm S is wind engineered and heavy so its best suited to a Ground Anchor
