Mistral – Single, Duo and Quad

Mistral cantilever parasols or umbrellas offer unparalleled flexibility – maximum coverage from a small footprint. Available in **Singles to 9m2, Duos to 18m2, or Quad to 36m2**, all folding into a single compact vertical format when not in use. Due to their lightweight design the **Mistral** side post is easily removed for seasonal storage. These parasols incorporate a unique gas spring assist, which makes them easy to open and close in a single, straightforward sliding motion. No worries about knocking tables and chairs over either for the Mistral clears most table heights. These are the ideal parasols for hospitality or your patio at home.

Uniquely (for the square sizes), the mast is situated at the corner of the "square," which allows the parasol mast to be situated in the corner of a patio or terrace. The sturdy mast is made from 100mm square extruded aluminium section and powder coated grey. Stainless steel fittings are used throughout

Mistral can be placed on a discreet ground anchor or onto a wheeled pedestal base. Heating and lighting options are also available

How to operate: Mistral Click
