Verona Telescopic Centre Post

Verona-IT

Verona: Strength Meets Simplicity
The new Verona umbrella brings together the practicality of a telescopic opening system with the sturdy rod design. Featuring a robust 80mm diameter pole, it's built for effortless use and professional settings like hotels, restaurants and bar terraces.
The framework is available in both Carbon and White finishes perfectly complementing any space.

Why Choose Verona?

- ☑ **Durable & Reliable – Engineered for heavy-duty use in the HoReCa sector**
- ☑ **Effortless Operation – Smooth telescopic aluminium frame for easy opening and closing**
- ☑ **Sleek & Strong – Stainless steel hardware with black or white nylon components**

Modern, sturdy, & hassle-free— Verona is designed to last!

The above mentioned data are indicative, although provided by scientific measurements performed in certified laboratories.

Pleating a canopy

1. Carefully pull out any material trapped within the frame. Gather two pleats opposite the canopy ties

2. Roll the two pleats together down to the frame

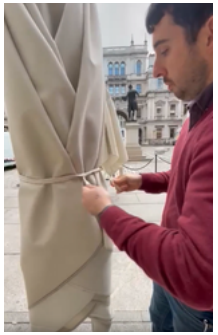

3. Bring around the next loose pleat, restricting the previously rolled pair

4. Repeat the process, left over right ensuring fabric is kept as smooth as possible. Repeat until all pleats are fully restrained

5. Tie the canopy together so it doesn't unfurl, using the sewn on canopy tie, or a seperate canopy strap.
